Search Tips

- Adjacency:** Multiple words are searched together as one phrase.
Example: world health organization
- Wildcards:** Words may be right-hand truncated using an asterisk. '*' for 1-5 characters, '^*' for open-ended truncation, '?' to replace a single character anywhere within a word.
Examples: environment* polic*, inter*.*, wom?n
- Boolean Operators:** Use "and" or "or" to specify multiple words in any field, any order. Use "and not" to exclude words.
Example: stocks and bonds
Example: (alaska or canada) and (adventure and not vacation)
- Proximity Operators:** Use "near" to specify words close to each other, in any order.
Example: california near university
- Field limits:** A field limit causes the system to search only the specified field for the specified word(s).
- Grouping:** Keyword search results are usually grouped by relevance to bring the most likely titles to the top of the list. Each group represents a similar level of relevance and results are sorted within the group by date or title. To get an ungrouped result set, use boolean operators to form a complex query.
