QUÈ ÉS?

CINAHL (Cumulative Index to Nursing and Allied Health Literature) és una base de dades d'abast internacional publicada inicialment per **Cinahl Information Systems**. Correspon al repertori imprès del mateix nom, publicat per l'**American Nurses Association** i la **National League for Nursing**.

Buida més de 5.400 revistes i incorpora també monografies, ponències, evidència mèdica i comunicacions científiques especialitzades en **infermeria, biomedicina, medicina alternativa i altres disciplines** relacionades amb les ciències de la salut. Actualment té uns 5 milions de registres que daten des del 1937 fins a l'actualitat.

El CRAI de la UB proporciona fins a 5 accessos simultanis a la base de dades. La mateixa eina de cerca permet utilitzar altres bases de dades EBSCO conjuntament.

Recordeu que per <u>accedir als recursos electrònics</u> contractats pel CRAI cal activar el SIRE i autentificar-se amb l'identificador UB.

QUÈ ÉS?

Amb CINAHL podreu:

- Fer cerques especialitzades en infermeria i disciplines afins.
- Consultar les referències citades i les citacions que ha rebut un article.
- Llegir els resums i accedir al **text complet** de molts articles.
- Personalitzar la cerca i la visualització de la interfície de consulta.
- Tenir un compte d'usuari i desar les cerques o els resultats seleccionats.

Centre de Recursos per a l'Aprenentatge i la Investigació

CONSELLS DE CERCA

Per millorar les cerques podeu fer servir els recursos següents:

Recordeu utilitzar sempre l'anglès.

- 1. Seleccioneu en quins **camps** busqueu la informació per aconseguir resultats més pertinents.
- 2. Utilitzeu els operadors booleans (AND, OR, NOT) per combinar els termes.

Infection AND injury

Localitza documents que continguin tots dos termes.

Injury <mark>OR</mark> trauma

Troba documents que continguin tant la paraula *injury* com la paraula *trauma*.

Injury NOT trauma

Cerca documents amb la paraula *injury* i exclou els que continguin el terme *trauma*.

CONSELLS DE CERCA

- 3. Marqueu amb **cometes** ("xxx") els termes compostos per marcar que la cerca és per frase. Per exemple, si busqueu "nursing care" o "asperger syndrome".
- 4. Empreu els **parèntesis** per definir l'ordre dins la cerca. Si no s'apliquen els parèntesis, la cerca es fa d'esquerra a dreta. En la cerca següent s'aplicarien:

("Breast Neoplasms" OR "breast cancer") AND ("Attitude to Illness")

- 5. Utilitzeu un dels truncaments següents per trobar variacions dels termes:
 - L'asterisc (*) serveix per buscar les paraules que comencen amb la mateixa arrel.

Per exemple: *child* $* \rightarrow$ *child*, *children*, *childhood*

• L'interrogant (?) serveix per substituir una lletra.

Per exemple: $Ne?t \rightarrow Neat$, nest o next

• El **comodí (#)** substitueix una lletra o cap.

Per exemple: M#cdonald \rightarrow Mcdonald i Macdonald

CERCA BÀSICA

La cerca bàsica busca els termes en tots els camps de la base de dades.

CERCA AVANÇADA

Permet cercar diversos termes en diferents camps: autors, títol, resum, títol de revista, matèries, etc.

GESTIÓ DELS RESULTATS

Incorporeu les referències a Mendeley.

崖 Print	
🙀 E-mail	
💾 Save as File	
Export	•

Exporteu les referències en format RIS.

Save citations to a file formatted for:

 Direct Export in RIS Format (e.g. CITAVI, EasyBib, EndNote, ProCite, Reference Manager, Zotero)

Direct Export to EndNote Web

Generic bibliographic management software

Citations in XML format

També podeu descarregar-vos els articles en PDF i després afegir-los a Mendeley.

I després importeu l'arxiu des de Mendeley.

Mendeley Desktop		
File Edit View Tools Help		
Add Files	Ctrl+O	
Add Folder Watch Folder Add Entry Manually	Ctrl+Shift+O -	BibTeX (*.bib) EndNote XML - EndNote v8, X1 to X3 (*.xm
Import	•	RIS - Research Information Systems (*.ris)
Export	Ctrl+E	Zotero Library (zotero.sglite)
Send by E-mail		, (,
Merge Documents	1
