Whole-Genome Sequence of *Aeromonas hydrophila* Strain AH-1 (Serotype O11)

Gabriel Forn-Cuní, Juan M. Tomás, Susana Merino

*Aeromonas hydrophila* is an emerging pathogen of aquatic and terrestrial animals, including humans. Here, we report the whole-genome sequence of the septicemic *A. hydrophila* AH-1 strain, belonging to the serotype O11, and the first mesophilic *Aeromonas* with surface layer (S-layer) to be sequenced.
