The Institutional Repository started with a collection of educational resources:

- Initially with two customized licenses based on CC BY-NC-SA and CC BY-NC-ND
- Providing DOI to any educational resource posted
- Collaborating in a Catalan Educational Repository

Fourth activity: from education to research

Fourth activity: from education to research

Recercat was the first collective repository in Catalonia, focused in gray literature to avoid copyright issues.

It used a CC BY-NC-ND license by default

It was the seed to our research collection in our IR

The use of a CC license allowed the introduction of these legal tools in PhD dissertations

The challenges of opening research

Institutional Repository

- As open as possible: CC licenses by default where possible, embargoed items with a opening date
- Clear identification of rights: copyright holder, terms of use, rights URI
- For publications, posting of the nearest version to the published one, at least a peer reviewed version
- Easy procedure for posting

The challenges of opening research

Policy

- Institutional policy in 2011, requiring a copy of any published version
- Open Access funds from September 2010

Support for green and gold roads

Managing copyright in research publications
