

CINAHL *with Full Text*

(Cumulative Index to Nursing and Allied Health Literature)

Febrer de 2013

CINAHL

Presentació

CINAHL (Cumulative Index to Nursing and Allied Health Literature) és la base de dades d'abast internacional produïda per **Cinahl Information Systems**, que correspon al repertori imprès del mateix nom publicat per l'**American Nurses Association** i la **National League for Nursing**.

Buida més de 4.500 títols de revistes i té actualment 2,3 milions de registres.

El CRAI de la UB proporciona fins a 5 accessos simultanis des d'ordinadors de la UB (o amb connexió *proxy*) a aquesta base de dades a través del proveïdor **EBSCOhost**.

CINAHL i **EBSCOhost** permeten:

- Personalitzar la cerca i visualització de la interfície de consulta
- Crear un compte d'usuari
- Disposar d'enllaços permanents a cerques
- Veure quins treballs han estat citats
- Extreure els documents en format codificat compatible amb el gestor de bibliografia

RefWorks

CINAHL

Presentació

CINAHL conté informació bibliogràfica d'articles de revistes, monografies, tesis, ponències i comunicacions, programari educatiu, publicacions especialitzades, estàndards, capítols de llibres, material audiovisual i documentació sobre evidència mèdica publicada majoritàriament en llengua anglesa.

Aquesta informació bibliogràfica prové de publicacions especialitzades en infermeria, biomedicina, biotecnologia, medicina alternativa i complementària, i fins a 17 disciplines més relacionades amb les ciències de la salut des de 1973. Inclou les publicacions de la **National League for Nursing** i de l'**American Nurses Association**.

A més, proporciona accés al text complet de 275 monografies i de 770 títols de revistes, 80 dels quals tracten sobre casos jurídics, innovacions clíniques, trajectòries crítiques, fàrmacs, instruments de recerca i assaigs clínics. Inclou, a més, referències citades de 1.340 revistes.

L'actualització de la base de dades per **EBSCOhost** és diària.

CINAHL

Descripció de la pantalla

Les opcions per personalitzar la interfície, guardar resultats o trobar ajuda i informació addicional les trobem a la part dreta de la pantalla.

A la part esquerra tenim l'accés a les diferents opcions de cerca que ens permet la base de dades.

The screenshot shows the CINAHL search interface. A blue navigation bar at the top contains links for 'New Search', 'Publications', 'CINAHL Headings', 'Cited References', and 'More'. The 'More' dropdown menu is open, showing 'Images' and 'Indexes'. On the right side of the navigation bar, there are links for 'Sign In', 'Folder', 'Preferences', 'Languages', 'New Features!', and 'Help'. Below the navigation bar, the search area includes a search box with the text 'Searching: CINAHL with Full Text' and a 'Choose Databases' link. There are three search rows, each with a text input field, a dropdown menu for 'Select a Field (optional)', and a dropdown menu for 'AND'. The 'Search' and 'Clear' buttons are visible. At the bottom left, there are links for 'Basic Search', 'Advanced Search', 'Visual Search', and 'Search History'. Two red boxes with arrows point to the search options and the navigation bar. A third red box with an arrow points to the 'Sign In', 'Folder', 'Preferences', and 'Languages' links.

Aquests enllaços ens permeten escollir el tipus de cerca que volem fer.

Aquests enllaços ens permeten personalitzar l'idioma de la interfície, guardar els resultats i crear serveis d'alerta, entre d'altres.

CINAHL

Consells de cerca

La base de dades permet l'ús de:

Operadors booleans:

AND, OR i NOT - per combinar els termes o les cerques

Comodins:

asterisc (*) - per cercar paraules que comencen amb la mateixa arrel

p. ex.: child (trobareu: child, child**ren**, child**hood**)*

signe d'interrogació (?) - us permet substituir una lletra

*p. ex.: Espa?a (trobareu: Espa**ña**, Espa**na**)
wom?n (trobareu: wom**a**n, wom**e**n)*

CINAHL

Com cercar

Podem fer una cerca bibliogràfica a la base de dades de tres maneres diferents:

Cerca bàsica (*Basic Search*)

Searching: CINAHL with Full Text | Choose Databases »

Search Clear ?

▼ Search Options **Basic Search** Advanced Search Visual Search Search History

Cerca avançada (*Advanced Search*)

Searching: CINAHL with Full Text | Choose Databases »

in Select a Field (optional) Search Clear ?

AND ▼ in Select a Field (optional)

AND ▼ in Select a Field (optional) Add Row

Basic Search **Advanced Search** Visual Search Search History

CINAHL

Com cercar

Searching: **CINAHL with Full Text** | Choose Databases »

Advanced Search | **Visual Search** | Search History

Search Clear ?

CINAHL

Cerca bàsica

La **Cerca bàsica** ens permet fer una cerca bibliogràfica per paraules clau (en anglès).

The screenshot shows the EBSCO HOST search interface. The search bar contains the text "insulin and diabetes". To the right of the search bar are buttons for "Search" and "Clear". Below the search bar, there are options for "Basic Search", "Advanced Search", "Visual Search", and "Search History".

a) Escrivim les **paraules clau** del tema sobre el qual volem trobar documents.

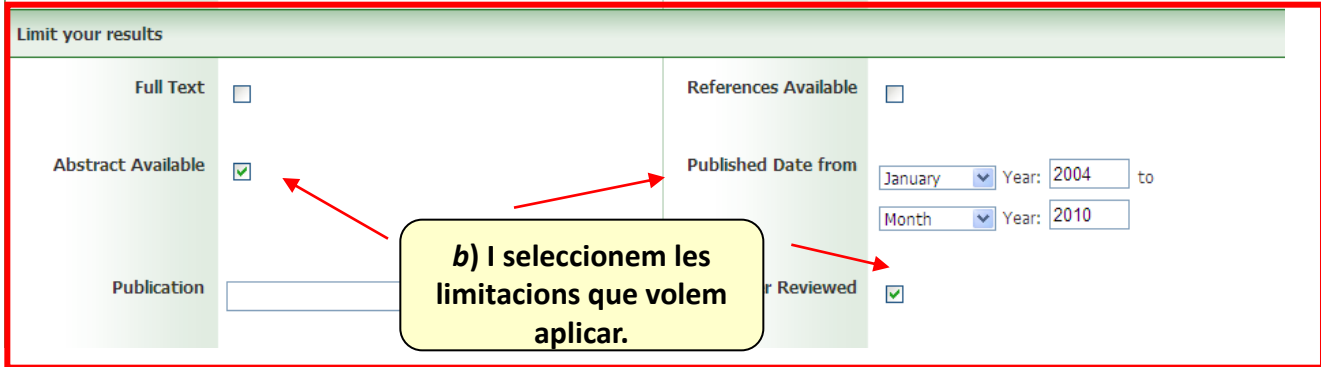

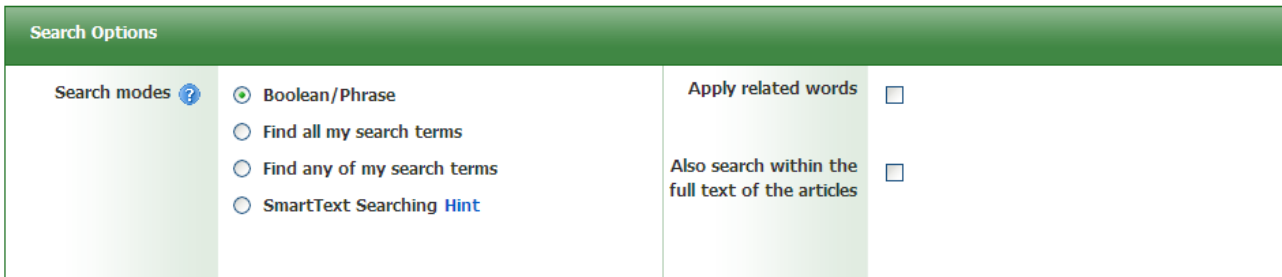

b) I a continuació **fem clic a Search** per executar la cerca.

CINAHL Cerca bàsica

Si volem aplicar límits a la cerca realitzada podem fer-ho per **data de publicació, tipus de publicació, gènere, etc.**

a) Fem clic a *Search Options*.

b) I seleccionem les limitacions que volem aplicar.

CINAHL

Cerca avançada

Aquesta opció avançada permet fer una cerca amb diversos termes simultanis en diferents camps de descripció dels articles: autors, títol, resum, títol de revista, etc.

The screenshot shows the CINAHL advanced search interface. At the top, there are navigation tabs: "New Search", "Publications", "CINAHL Headings", "Cited References", and "More". On the right, there are links for "Sign In", "Folder", "Preferences", "Languages", "New Features!", and "Help". The main search area contains a search bar with the text "insulin" and "diabetes" separated by "AND" operators. Below the search bar, there are dropdown menus for selecting search fields, with "TI Title" selected in two instances. A "Search" button and a "Clear" button are visible. A yellow callout box points to the "Search" button with the text "c) I fem clic a Search per executar la cerca." Below the search bar, there are tabs for "Basic Search", "Advanced Search", "Visual Search", and "Search History". A green "Search Options" section contains a "Reset" button and a "SmartText Searching Hint" option. A red callout box points to the search terms with the text "a) Introduïm els termes que volem cercar." Another red callout box points to the field selection dropdowns with the text "b) Seleccionem els camps on els volem buscar." At the bottom, there is a "Limit your results" section with checkboxes for "Full Text", "Abstract Available", "References Available", and "Published Date from" with month and year dropdowns.

a) Introduïm els termes que volem cercar.

b) Seleccionem els camps on els volem buscar.

c) I fem clic a Search per executar la cerca.

CINAHL Cerca visual

Aquesta opció ens presenta els resultats de la cerca en format de mapa visual interactiu.

CINAHL

Altres opcions de cerca

Utilitzem **Cited References** si volem saber tant el nombre de citacions que ha tingut un treball com els autors que l'han citat. Permet la cerca per títol, autor, any, etc.

The screenshot shows the CINAHL database interface. At the top, there is a navigation bar with 'Cited References' highlighted in a red box. Below this, the search criteria are displayed: 'Cited Author:', 'Cited Source:', and 'All Citation Fields:'. The 'Cited Title' field contains 'Health related quality of life among' and is also highlighted in a red box. A red arrow points from this field down to the search results. The search results are displayed in a table with two entries. The first entry is 'Health-related quality of life among insulin-dependent diabetics: disease-related and psychosocial correlates. Aalto A; Uutela A; Aro A; Patient Education and Counseling, 1997; 30 (3); 215-25. (Article Citation) (ARTKEY: PEC.CJ.BAE.AALTO.HQLAID) Database: CINAHL Refs'. The second entry is 'Health related quality of life among insulin-dependent diabetics: disease-related and psychosocial correlates. Aalto AM; Uutela A; Aro AR; Patient Educ Counsel, 1997; 30; 215-225. (Article Citation) (ARTKEY: PEC.CJ.BAE.AALTO.HRQLAI)'. A yellow callout box on the left contains the text 'La pantalla us mostrarà tant el nombre de citacions com els articles que els citen.' and has red arrows pointing to the 'Times Cited in this Database: (6)' and the second search result.

CINAHL

Altres opcions de cerca

Images cerca dins la col·lecció d'imatges indexades a la base de dades: en blanc i negre o color, diagrames, il·lustracions, etc.

The screenshot displays the CINAHL database search interface. At the top, there are navigation tabs: "New Search", "Publications", "CINAHL Headings", "Cited Reference", and "More". The "More" tab is highlighted with a red box, and a dropdown menu is open, showing "Images" and "Indexes". Below the navigation, there is a search bar with the text "insulin" and buttons for "Search" and "Clear". A red box highlights the search bar, and a red arrow points from it to the "Image Type" section in the "Search Options" panel.

The "Search Options" panel is divided into two main sections: "Search modes" and "Limit your results".

Search modes:

- Boolean/Phrase
- Find all my search terms
- Find any of my search terms
- SmartText Searching [Hint](#)

Limit your results:

Image Type:

- Black and White Photograph
- Diagram
- Illustration
- Chart
- Color Photograph
- Graph
- Map
- Image Quick View Collection

The search results are displayed in a list format. The first result is:

-  **Image found in article:**
[Inhaled Human Insulin \(Exubera®\): A Review of its Use in Adult Patients with Diabetes Mellitus.](#)
By: Dunn, Christopher; Curran, Monique P.. *Drugs*, 2006, Vol. 66 Issue 7, p1013, 20p, 5 Charts, 3 Graphs
Image Type: Graph; found on p1024
Database: Image Quick View Collection

The second result is:

-  **Image found in article:**
[A Critical Appraisal of the Role of Insulin Analogues in the Management of Diabetes Mellitus.](#)
By: Oiknine, Ralph; Bernbaum, Marla; Mooradian, Arshag D.. *Drugs*, 2005, Vol. 65 Issue 3, p325-340, 16p, 1 Diagram, 2 Graphs
Image Type: Diagram; found on p329
Database: Image Quick View Collection

CINAHL

Altres opcions de cerca

I la cerca per **Indexes** serveix per buscar dins d'una taula desplegable de termes indexats a la base de dades.

The screenshot shows the CINAHL search interface. At the top, there is a navigation bar with 'New Search', 'Publications', 'CINAHL Headings', 'Cited References', and 'More'. The 'More' dropdown menu is open, showing 'Images' and 'Indexes'. The 'Indexes' option is highlighted with a red box. Below the navigation bar, there is a search bar with the text 'Searching: CINAHL with Full Text' and a 'Choose Databases >' link. The search bar is empty, and there are 'Search' and 'Clear' buttons. Below the search bar, there are links for 'Basic Search', 'Advanced Search', 'Visual Search', and 'Search History'. The 'Indexes' section is highlighted with a blue header. Below the header, there is a 'Browse an Index:' dropdown menu set to 'Author' and a 'Browse' button. Below that, there is a 'Browse for:' input field containing the text 'andreu'. Below the input field, there are links for 'Page: Previous | Next'. Below the links, there is a section for 'Select one or more terms and add to search using:' with a dropdown menu set to 'or' and an 'Add' button. Below this section, there is a table with the following data:

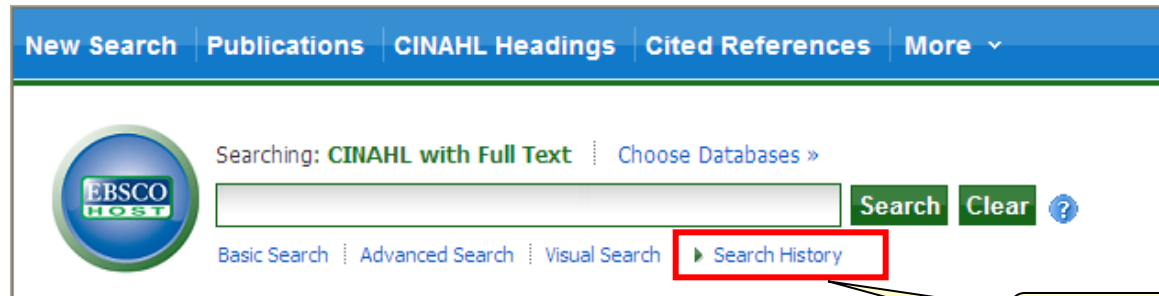

Term	Records Count
The term andreu would appear here had there been an exact match	
<input type="checkbox"/> andreu a	3
<input checked="" type="checkbox"/> andreu al	10
<input type="checkbox"/> andreu c	4
<input type="checkbox"/> andreu d	1

Three yellow callout boxes with red arrows pointing to the interface elements:

- a) Seleccionem el **camp** per on volem buscar.
- b) Introduïm el terme a la finestra de cerca.
- c) I el **seleccionem** de la llista de resultats.

CINAHL Recuperar i combinar cerques

L'opció **Search History** ens permet tant recuperar cerques anteriors com combinar-les.

a) Fem clic a l'opció **Search History**.

Search History/Alerts

CINAHL

Aplicar límits a les cerques

CINAHL permet aplicar limitacions a les cerques per obtenir resultats més específics.

Les més habituals són:

- Limitar els resultats a **articles a text complet**.
- Limitar les cerques segons la **data de publicació** del document.
- Limitar les cerques per **tipus de document**: *review, clinical trial*, etc.
- Suprimir les **referències sense resum**.

CINAHL

Aplicar límits a les cerques

Podem aplicar les limitacions des de dos entorns diferents:

1. Abans de fer la cerca. Introduint els termes a la finestra de cerca i seleccionant les limitacions que volem aplicar-hi.

b) I finalment fem clic al botó **Search**.

CINAHL

Aplicar límits a les cerques

2. **Després de fer la cerca.** Quan tenim a la pantalla la llista de resultats els límits aplicables se'ns presenten a la columna esquerra.

The screenshot shows the CINAHL search results interface. On the left side, there are two main sections for refining results, both highlighted with red boxes:

- Refine your results:** This section includes checkboxes for 'Full Text', 'References Available', and 'Abstract Available'. Below these is a 'Publication Date' filter with a range from 2004 to 2010 and an 'Update' button.
- Source Types:** This section includes checkboxes for 'All Results', 'Academic Journals', 'Periodicals', 'Dissertations', and 'CEUs', along with an 'Update' button.

Below these sections are filters for 'Age', 'Subject: Major Heading', 'Gender', and 'Publication'. The main content area on the right displays a list of search results. Two red callout boxes with white text point to the filtering options:

- The first callout box, pointing to the 'Refine your results' section, contains the text: **Podeu limitar per: data de publicació, articles amb resum, etc.**
- The second callout box, pointing to the 'Source Types' section, contains the text: **Podeu filtrar els documents per: tipus de publicació, grups d'edat, gènere, etc.**

The search results list includes titles such as 'Timeliness of breast cancer diagnosis and initiation of treatment in the National Breast and Cervical Cancer Early Detection Program, 1996-2005.' and 'Evaluation of a risk factor-based (intervention study) model for breast cancer risk prediction in women with atypical hyperplasia.' Each result includes a snippet of the abstract and a 'Relevancy' score.

Major Subjects: Breast Neoplasms -- Diagnosis
Breast Neoplasms -- Therapy
Early Intervention
Time Factors

Minor Subjects: Benchmarking; Confidence Intervals; Descriptive Research; Education, Competency-Based; Female; Guideline Adherence; Human; Kruskal-Wallis Test; Logistic Regression; Mammography

Abstract: OBJECTIVES: To determine the effects of program policy changes, we examined service delivery benchmarks for **breast cancer** screening in the National **Breast** and Cervical **Cancer** Early Detection Program (NBCCEDP). METHODS: We analyzed NBCCEDP data for women with abnormal mammogram or clinical **breast** examination (n = 382 416) from which 23 701 cancers were diagnosed. We examined time to diagnosis and treatment for 2 time periods: 1996 to 2000 and 2001 to 2005. We compared median time for diagnostic, treatment initiation, and total intervals with the Kruskal-Wallis test. We calculated adjusted proportions (predicted marginals) with logistic regression to examine diagnosis and treatment within program benchmarks (< /= 60 days) and time from screening to treatment (< /= 120 days). RESULTS: Median diagnostic intervals decreased by 2 days (25

RESEARCH AND PRACTICE

Timeliness of Breast Cancer Diagnosis and Initiation of Treatment in the National Breast and Cervical Cancer Early Detection Program, 1996–2005

Lisa C. Richardson, MD, MPH, Janet Royalty, MS, William Howe, BS, William Helsel, MS, William Kammerer, BS, and Vicki B. Benard, PhD

Screening for breast cancer reduces morbidity and mortality from breast cancer when women receive timely follow-up and appropriate treatment.¹ There are few data to indicate what the optimal diagnostic and treatment intervals are that might ensure the best chances of survival from breast cancer detected by screening with mammography.^{2,3} Recent information from organized screening programs in Canada and the United Kingdom showed that women who waited longer than 6 to 12 months for diagnostic workup were more likely to have larger cancers and

Objectives. To determine the effects of program policy changes, we examined service delivery benchmarks for breast cancer screening in the National Breast and Cervical Cancer Early Detection Program (NBCCEDP).

Methods. We analyzed NBCCEDP data for women with abnormal mammogram or clinical breast examination (n = 382 416) from which 23 701 cancers were diagnosed. We examined time to diagnosis and treatment for 2 time periods: 1996 to 2000 and 2001 to 2005. We compared median time for diagnostic, treatment initiation, and total intervals with the Kruskal–Wallis test. We calculated adjusted proportions (predicted marginals) with logistic regression to examine diagnosis and treatment within program benchmarks (≤60 days) and time from screening to treatment (≤120 days).

Results. Median diagnostic intervals decreased by 2 days (25 vs 23; P < .001). Median treatment initiation intervals increased by 2 days (12 vs 14; P < .001).

Treballar amb les referències: exportar a un gestor bibliogràfic

The image shows a screenshot of the EBSCOHost interface. On the left, a vertical menu contains options: Print, E-mail, Save as File, and Export. The 'Export' option is highlighted with a blue border. A yellow callout box points to it with the text 'a) Fem clic al botó Save.' On the right, the 'Save' tab is active, showing 'Number of items to be saved: 10' and a 'Save' button. Below this, there is a list of options for 'Save citations to a file formatted for:'. The 'Direct Export to RefWorks' option is selected and highlighted with a red box. A yellow callout box points to this option with the text 'b) Triem el format o el gestor bibliogràfic.'

a) Fem clic al botó Save.

b) Triem el format o el gestor bibliogràfic.

EBSCOHost permet la possibilitat d'exportar les referències directament al gestor de bibliografia
