APPENDIX A

FIELD NOTES FROM MARK 11/11/91, Monday (2 hours)

Returning corrected compositions at the beginning of class. T deals with students individually. All in all it takes about five minutes. From what I can see from a distance, T gives a grade to compositions (I’ve seen a "6" and an "8"). *(I’ll need to get hold of a corrected composition at some point).*

T gives a folded piece of paper to Llorenç and the others joke about T being "la Celestina." On the way home, T talks about his American students and says that some time ago he asked these students to give a questionnaire to a Spanish person and he arranged for some of these American students to meet with his level three students. Llorenç has kept in contact with one of them.

T tells students he's forgotten his notes for the class today. Later I will tell him that I can leave if he feels uncomfortable without the notes. He says it's OK. *It's funny though that he mentioned it to the students.* I think that is why he said they couldn't correct the exercises students had done for homework. He added that when he forgot the book it was no problem, he borrowed it from a student. *From what he said, it seemed that forgetting his notes was somewhat of a problem.*

I hand in questionnaires to students. Mark agrees this is a good day for him since he doesn't have his notes. We talk while students are busy. He comments that he did the same learner

training sheet (LTGEN2) that he used in this class with his other two level three classes and said that they all said the same thing, which he thinks is true: "All classes said they didn't have enough English." It seems that either he underestimates the students' potential to communicate in English or that Sharon and Bob overestimate that potential. The use of the language to communicate to each other when students are in groups is much higher in Sharon's class than in Mark's (although Sharon's students seem to be more conscious of my presence than Mark's and they may be using more English than usual).

The students who sit on the side of the class beside the window are more noisy and informal. They are more humorous and seem to talk to the teacher in between tasks more often than students on the other side. There are also more men in this group. For example, when the class was almost finished with the questionnaire, some students from this group talked to the teacher about soccer. The teacher had sat near those students while students were filling out the questionnaire. It was where there was more room left too.

T comments to me that this is quite a good class. As a proof he mentions the fact that most students bring dictionaries to class. Later on in class he insists that the students who haven't got dictionaries to bring them ("An intelligent thing to do is to bring a dictionary to class") and jokes with them that the only ones who don't bring dictionaries are the men. Students laugh. One male student adds "You need a handbag." I guess T has a bilingual dictionary in mind when he says all this and that the dictionaries that students bring are bilingual (I need to check).
The rest of the class is going to be devoted to doing the three exercises from a handout titled "Events and circumstances" (see handout pp. 352-3), following the same order as in the book.

Exercise 12.1. Question 1 a and b. T writes the following about paragraph A (see handout) on the blackboard, which is a model of what students have to do:

**Events** (what happened) | **Circumstances** (What was happening)
---|---
met your father | living in London
he walked in | having lunch
asked if he would share

Little further explanation is given to ss besides what appears in parenthesis on the blackboard. Students need to do the same with paragraphs B, C and D in the handout. *(Mark tends to write his explanations on the blackboard. Maybe he is not sure about the grammar.)*

*I am starting to think about changing position during the observations. Sometimes it's difficult to follow what a group of students are saying, where they are looking at, whether they are writing or not if I am sitting at the back of the room. Maybe a better place would be one end of a middle row.*

Students are doing the exercise. There is one student who has written full sentences and not just the verb phrase as in the example from the blackboard.
Correction of exercise. T copies answers down on bb. I wonder how necessary it is to copy this down when students have all got the handout and the task is not that complicated.

The break. I talk to two students during the break. One of them is going to give the talk on Wed. and is worried about her pronunciation. The other asks me how long I've been in an English-speaking country. She praises my English and says she's going away to Holland. She's afraid not to make friends because of her English. She says she wants to learn a lot in the meantime. I think that later in class she asked me for the translation of a word in English. (Is it good that they ask me and I answer them?) I realize that having two hours of class time, the rhythm of the class is not so hectic and it is good for me because I can talk with students. In this class I have more contact with Mark too because he and I take the same bus home.

The T continues with 12.1., the section on Practice. It is interesting to see that question 2 in the previous section (Presentation) has been omitted. It was a grammar discovery question. Additionally, what was presented in the handout as a "presentation" section was dealt with as an exercise.

These are the T's instructions for the Practice section:

"Here you’re going to make sentences. Don't write them though. Connect them. Then you are going to tell me. Do this in pairs, the same pairs as before."

He reinforces: "Don't write. You can write on the photocopy." (Very interesting. "Don't write" must mean "don't write on your notebooks." As I have mentioned before, this class is quite used to
copying.) During the presentation of the task Mark has also written the following on the blackboard to help them with the exercise:

Circumstance + when + event
(An example is written below)
Event + while + circumstance
(An example is written below)

Students write this information before they start with the exercise.

Students are doing the exercise. From the frequent use ss make of their dictionaries, one would think that this is more of a vocabulary exercise than a grammar exercise. This impression I've gotten from this as well as from how I have seen students do other exercises in the past.

The exercise is corrected. Previously, the teacher had written the phonetic transcription of the word "consciousness" on the blackboard. He had assumed the pronunciation of that word during correction would be problematic. When they correct the exercise and reach that word, students see that the T had "prepared" that word and there is a burst of laughter. Students read the exercise out loud to correct.

Exercise 12.2. The procedure followed is similar to the two previous exercises:
1. The teacher reads the dialogue that models the exercise from the handout.
2. T explains vocabulary (can't remember if requested or unrequested by students).

3. T elicits the first dialogue from sentence one in the exercise from students and writes it on the blackboard (most students are not copying).

Mark says he wants them to continue. A student asks T on a one-to-one basis: "We must write it?" The teacher answers "Not necessarily. But remember." Mark makes this an announcement for the whole class, repeats it for a second time and adds "because it'd be too long."

Students are working in groups. On one occasion, the teacher hears a student mispronounce a word. He corrects it by writing the transcription on the blackboard but without going back to the student to check if she can pronounce the word correctly now. In general, I find there is a mismatch between the grammar students use and their pronunciation, which are poor when used spontaneously, and what they study (through grammar exercises etc.). But that could not be an influence of this teacher only. Should I check if most people were together in class last year? Mark said they knew each other, but that could be from their departments.

An oral correction follows.

Section 12.3 titled "Headline news". T reads example from handout. T rearranges grouping and gives a sentence per group. This is a more creative exercise where students rewrite in full sentences an item of news from a title they are given. Ss are very
lively thinking of a context (I hear "1 de mayo," "Militante terrorista"). The ones I am listening to want to write something humorous (looks a little like project work). The class is loud and enthusiastic. Some are not on task. The groups on task that I can hear give their ideas about what they can write in the L1 first and then translate it into English to put it into writing.

Unit 12 Events and circumstances

12.1 EVENTS AND CIRCUMSTANCES

Presentation

Read the four passages below and answer the questions.

A. First he cut his finger while we were living in Paris about 2 years ago. He was having another small operation in Kensington when he worked in and asked if he could sit at my table.

B. Poors Phillips. She was walking down the High Street yesterday when a chimney fell off one of the houses and crashed onto the pavement. It missed her by inches.

C. The tiles were uncovered accidentally by workmen when they were laying gas mains. An expert from the museum was called in, and he identified them as part of a Roman villa.

D. Remember what it was yesterday. We were all sitting in the kitchen playing cards when the music suddenly stopped and they announced that he was dead. We just couldn't believe it.

1. What are the events in each passage?
2. In what circumstances did these events occur?
3. How are they when is while used to link events and circumstances?

Practice

Match the events and circumstances in the two lists below. Join each pair using when or while as in the example.

Example: He was painting the ceiling when he fell off the ladder.

He fell off the ladder while he was painting the ceiling.

Events
- He fell off the ladder
- His jeans split
- He burnt his hand
- The TV screen went black
- He lost consciousness
- The fire burst
- He found his passport
- His pen ran out
- He bit his tongue

Circumstances
- He was writing a cheque
- He was tidying his room
- He was chewing over the fence
- He was having breakfast
- He was painting the ceiling
- He was taking the meat out of the oven
- He was being given the injection
- He was turning a corner
- He was watching the news
12.2 CIRCUMSTANCES AND CONSEQUENCES

Practice

A: I saw an accident yesterday.
B: What were you doing at the time?
A: I was queueing for the cinema.
C: And what did you do when you saw the accident?
A: I rushed forward to see if I could help.

Work in threes. Have similar conversations, beginning with these remarks:
1. I broke a tooth this morning.
2. I got cramp in my leg yesterday afternoon.
3. The au pair girl broke two glasses yesterday.
4. We were chased by a bull last week.
5. Jack cut his face this morning.
6. She lost the top of her bikini yesterday afternoon.

Report your answers to the rest of the class.

Example: I was queueing for the cinema yesterday when I saw an accident, so I rushed forward to see if I could help.

12.3 HEADLINE NEWS

Practice

Look at the newspaper headlines below, and explain what they mean:

Example: Express derailed at 90 mph

An express train was derailed while it was travelling at 90 miles per hour.

Boeing 747 hijacked over Atlantic
150 arrested in anti-nuclear demonstration
Ambassador’s son kidnapped on way to school
Tomatoes thrown at Minister during speech
Man with gun arrested at Heathrow
GOLFE: 57 struck by lightning

Writing

Choose one of the headlines and develop it into a paragraph. Add any details you like, and add at least one more event.

Example: An express train was travelling at 90 m.p.h. on the main line from London to Manchester last night when it was derailed by a tree which was lying on the line. Fortunately, no-one was killed, although 30 passengers were taken to hospital suffering from minor injuries.

APPENDIX E

A SAMPLE FROM THE INTERVIEW TO BOB

Date: 13/12/91
Place: Staff room

I: What personality do you think that class has? How would you characterize it?

B: I can characterize it in terms of learner expectations. Their expectations as to what their role is in class is that they should be fairly passive, that the class is teacher-led. This is OK when they do presentations and control practice but it is a problem when they do production activities such as brainstorming or free practice. Consequently it takes the class time to get going and I find myself giving quite a lot of examples of what is expected from a role-play, a dialogue. These examples have to be given to them before they feel confident enough to go ahead with that.

I: You emphasize giving instructions in a way.

B: No. No.

I: Not instructions but emphasizing your expectations.

B: Yeah. I find that the class works if you tell them what is expected of them. However, I don’t emphasise giving instructions, if anything I’ve been trying to make them come to terms with the idea that they can X and have a go. However, with the class that you’ve been watching they’re young, most of them are around nineteen and I’m not sure what their previous language learning experience was but they certainly don’t seem to accept the idea that they can jump in that readily. If I compare this class with

1 What each color stands for is indicated at the end of this Appendix.
my other intensive level three class that I have in the evening, that class has more cohesion because it is a two-hour class intensive course. The people are older and the content can be analysed much more so that they can express their opinions and what they want to say in English. Going back to this class, these students have opinions too but are not so ready to give them, maybe because of certain inhibition, because they are young I feel they are inhibited, some of them. Their learning experience in the faculty conditions them too not to have opinions, especially in Economics.

I: Probably the fact that the class takes place there makes them so serious and the classroom too as we were saying the other day.

B: Yes, very much so yeah.

I: And have you noticed any changes in them?

B: Yes.

I: This is what they are like, but do you think they have succeeded in decreasing this inhibition?

B: Yeah, very much so. However, it's not through, I feel unfortunately, it's not through learner training. It's more through the fact I've been looking for material to adapt to them really. For example, we discussed the topic of pollution with the intensive class. And this topic couldn't be discussed in Economics because they are not much interested so we had to talk about the overcrowding of the Faculty. And that discussion went well, everyone talked. And they all produced quite a lot of material and they all made errors and we corrected them and they saw that they could jump in and they could express themselves. Even though they talked ungrammatically, they talked for a long long
time. I find I've been doing a lot of pyramid debates with this
group where a lot of time is spent in groups. I've concentrated on
that kind of activity quite a lot. And the groups are starting to
know each other. There's a feeling of confidence amongst
students. One to the other, not with me but one to the other. And
they are quite happy to talk now, whereas at the beginning of
the term they weren't. Again possibly that's their reaction to me
rather than their reaction to any sort of method. Now they seem
to be much more confident in that they will jump in and as I said
that's a result of the content really rather than X.

I: When you say you are adapting material to them you refer to the
content or your way of teaching the content?

B: Both. The topic but the way definitely. At the beginning I found
that the only way of presenting material was very much teacher-
led, whereas now I am concentrating more on fluency, with an
emphasis on activities, practice in small groups. Students feel
secure now in fluency activities, whereas before they didn't
always want to give their opinions in front of a lot of people.
Really, it's a question of how I've done it. I've arranged the
debates much more intimately so that they don't have to express
their opinions in front of more than one or two people. If they
have to express them in front of the whole class they tend to X
up. A concentration on fluency activities plus the intimate group
atmosphere, that's what has made them come out of themselves
and given the group more cohesion. They started to know each
other. But with respect with what they are going to learn, I still
feel they expect it to be teacher-led and don't expect to study
grammar or vocabulary on their own. We did a lot of work on
vocabulary and very few of them have vocabulary books or have started to look unintelligible.

I: You also mentioned that you did some work on listening and then no one bought Speak Up.

B: No one bought Speak Up because they still don't have any concept of what fluency is. The students think of learning English as learning vocabulary and grammar and doing a bit of speaking in class. They have no concept of fluency and structure. So the big fall down with the listening activities was that I didn't present them with any kind of distinction between structure and fluency. It's the fact that they have no concept of fluency.

Student liked the exercises I planned but missed the point of the exercise, although they liked the specific exercises, because fluency, not only in listening, but also in the other skills, is a long term thing and students don't work for something they think they will learn in a night—vocabulary and grammar—although they don't acquire it either. From students' point of view, the ability to speak or listen fluently will come one day, they don't see the need there is for them to develop it. That's where the class is stopping and faltering in that they are learning the grammar, they are learning the vocabulary but they aren't able then to acquire it because they have no concept of what fluency is. In those listening exercises, they missed the point or I missed presenting the point here that fluency and accuracy were two things which were important and the good language learner had a balance between them two.

Learner Training

En els darrers anys, especialista en el camp de l'aprenentatge de llengües s'han interessat per estudiar els processos i les estratègies que els estudiants de llengües estrangeres utilitzen al aprendre. La inclusió d'aquests processos i estratègies a l'aula s'anomena "Learner Training" i té com a objectiu el fer-te prendre consciència d'aquests mecanismes, per tal que progressis amb més rapidesa i efectivitat. "Learner Training" també presuposa que l'estudiant es responsabilitzi més del seu propi aprenentatge, doncs per molt anglès que el/la professor/a t'ensenyi, ell/a no poc aprendeix per a tu. Així doncs, aquest curs constarà d'un component de "Learner Training."

APPENDIX H

MORE ACTIVE ROLES FOR STUDENTS IN THE STRUCTURING OF LANGUAGE-LEARNING TASKS: SOME ALTERNATIVES

Instead of always having the teacher give students instructions orally, the following are some suggestions that may cause students to participate more actively:

- Once students have the material for the task, arrange them in pairs and leave some time to have them figure out what to do with it and react to it.
- Write instructions on the blackboard and ask students to read them in pairs.
- Direct students' attention to the written instructions from the textbook or handout being used and leave time for students to interpret them and ask questions.
- Pair students up and give instructions to only one student in each pair. Have students explain instructions to their partner. The instructions that the teacher will provide to only half the class can be given in writing or orally (ask the other half of the class to leave the classroom momentarily so that they do not hear instructions).

Instead of just relying on "back channel work" as a display of understanding of instructions, the following are some suggestions for this display to be more overt:

- Pair students up and ask them to explain to each other the instructions that the teacher has just given. In this way students check if their interpretations coincide.
- Ask one student to repeat the instructions back to the teacher after this has provided procedural structuring to the whole class.
It is important to note that the degree of suitability of the above suggestions will vary depending on the type of tasks being introduced (complexity of the instructions, skill being practiced and so on) and the teaching context (proficiency of students, number of students per class and so on), among others. I leave that for each teacher to adapt.
APPENDIX I

GUIDING QUESTIONS FOR DISCUSSION AND OBSERVATION
IN TEACHER DEVELOPMENT

Note. These questions would probably work best if teachers discussed them in reference to their own recorded lessons.

Procedural Structuring

- Are your instructions clear? Do you need to repeat them often?

- Are your students aware of the linguistic objectives that you have in mind in presenting a task? If not, is this purposeful on your part?

- Do students try to get permission to do tasks differently from how you present them? Is it possible that the tasks you present are too closed (leaving little choice for students)?

- How much detail do you go into when you explain the procedure in tasks? Which specific directions have you given in the past (look at the ones presented in Tables 5 and 6 on pages 140-1). Under what circumstances do you give this detail (important tasks, difficult tasks, students displays of lack of enthusiasm etc.)? Why do you give this detail?

- Do you value interaction in group work? If so, do you communicate to students the nature of the interaction you expect from them during group work? Do your style and beliefs resemble those of Bob and Sharon or those of Mark as regards the fostering of group work?

- Do you have medium-term learning objectives when you do the planning for your lessons? Do you usually communicate
them to students so that they know how present work relates to previous work and will relate to future work? Is there any point in doing so?

**Linguistic structuring**

What do you tend to do more often: implement full tasks to give linguistic preparation or give linguistic structuring? What determines this choice?

Those times when you provide linguistic structuring, do you do so during the preparatory segment or during the wrap-up segment? Bob, Mark and Sharon tended to do so in the wrap-up segment? Why do you think they did so?

Look at the seven types of linguistic structuring identified on pages 166-7. Which of them do you use more often? Which do you rarely use? Do you give linguistic structuring in a manner that was not identified in those pages?

How much interaction is there during linguistic preparation in your lessons? Do you think there should be any interaction?

What use do you make of the blackboard during the preparatory and wrap-up segments? How does your use of the blackboard differ from that of Mark?

**Topic structuring**

Do you make frequent use of topic structuring? On what occasions? Do you think it is a good way to start or end a task? Why?

Is there interaction during topic structuring? Do you think there should be?
Look at the list of types of topic structuring on p. 184. Which ones are part of your repertoire? Can you add some to the list?

Do you also give little personal information to students as Sharon did? Do you think that is good?

**Psychological structuring**

- How often do you provide psychological structuring? Why and under what circumstances?

Bob, Mark and Sharon usually provided specific instructions and psychological structuring in one same task. Do you also follow this pattern?

Do you tend to give more reassuring events than pressing events? Bob was observed to use pressing events in the preparatory segment and then adopt a reassuring style. Do you think this may be effective?

What else do you usually do to create an atmosphere in class that is conducive to learning?

**Use of humor**

- Are the preparatory and wrap-up segments places where you especially stimulate laughter in class? Is what usually happened in Mark's class a frequent situation in some of your classes?

**Learners in public talk**

- Students in the study were observed to ask procedural questions to the teacher in private. Have you noticed this happening in your classes? Why do you think students do so?
- How do you know whether students have understood your directions? Have you ever tried any of the suggestions given in Appendix II? Which ones do you think could work with your students?

- Think about a class you are teaching now where students were major initiators of stimuli for laughter. Was laughter shared like in Sharon's class or a challenge between the teacher and student like in some of Mark's excerpts?

**Learners' side-talk**

- Are students with you when you bring a task to a close or introduce a new one? If on those occasions they are talking to neighboring students, what do they talk about? Is there something in your teaching that could be nurturing an overlap of public and side-talk, as Mark's teaching seemed to do?

**Students' performances**

- Do your expectations about how a task should be done match how a task was actually performed in groups? Why do you think the simplifications reported in 5.3. were produced? Do you think something should be done to avoid these simplifications? What?

- Have you noticed any adaptations that students in your classes make? Why do you think students make them?

- Have you noticed behaviors from your students of overworking, similar to the ones described in Mark's students? Should these be avoided? If so, how?
APPENDIX J

TRANSCRIPTION CONVENTIONS

The conventions followed for the transcription of the audio recordings come from van Lier's (1988) adaptations from Jefferson (cited in Atkinson and Heritage, 1989), a few ideas from Allwright and Bailey (1991), plus a few personal adaptations that seemed convenient for my purposes.

The conventions are as follows:

• Symbols to identify participants

T Teacher.
L1, L2, etc. Identified learner.
Maurici Identified learner (fictitious name). Fictitious names have been used instead of L1, L2, . . . , at times when this information could not be recorded during the observation.
L Unidentified learner (sometimes sex is identified, then F (female) and M (male) are used instead of L).
Lx (y,z) Unidentified learner (to be distinguished from other unidentified learners)
LL Several learners (three or more).
C All or most of the participants in whole class configuration.
G A group of students.
O Observer.
R Tape recorder.
bb Blackboard.
(L3) Probably learner 3 but observer is unsure.
L1-L2 Two students in side-talk.
T-L1 / T-G Teacher talking to individual students or a small group of students.

• Symbols to use in text

? Rising intonation, not necessarily a question.
! Strong emphasis with falling intonation.
emphasis Marked prominence through pitch or amplitude.
e:r, the::: Lengthening of the preceding sound.
I don't- I can't express An unfinished word or utterance, a self-editing marker.

/ / Phonetic transcription, given when relevant.
.
.
(w.p.) Indicating wrong pronunciation of the word it follows.

• Symbols to identify types of information/talk

Two columns Two parallel extended conversations occurring at the same time. It usually consists of discourse between students that is simultaneous with discourse between the teacher and the whole class. It can also consist of simultaneous discourse from two different groups of students.

Indentation Extended discourse among students or between the teacher and students that is not addressed to the class as a whole. When there are two columns of discourse there is no indentation. It is usually used at times when students are engaged in seatwork.

(Let me think) ((Self talk)) It indicates that the observer has interpreted the preceding single bracketed utterance(s) as one that was not primarily addressed to an interlocutor. It is characterized by its low prominence because it is uttered quickly with a low tone of voice, distinctive from the remaining discourse.

(( )) Information within double brackets includes three types of information:

(a) Non-verbal and paralinguistic information of the utterance that precedes the brackets.
(b) Observations and running comments from the observer.
(c) Summaries of events that could not be transcribed because of lack of sound quality or because they were not relevant to my purposes. When these summaries cover long stretches of talk (several minutes) this information is used
together with three vertical dots on the left hand-side of the page.

(...) A turn or part of it that has not been transcribed or summarized.

• Symbols for relationships between speakers' utterances

[ ] Overlapping or simultaneous talk.

LL Yes. / Yeah. Overlapping or simultaneous short responses from several speakers.

L12 & L3 Two students saying something at the same time.

= a) A turn continuing below, at the identical symbol.
b) Indicating that there is no gap at all between the two turns, if inserted at the end of one speaker's turn and the beginning of the next speaker's adjacent turn.

• Symbols for uncertain transcription

L1 (you are there) Uncertain transcription.

X Incomprehensible item, probably one word.

XX Incomprehensible item of phrase length.

XXX Incomprehensible item beyond phrase length.

((XX)) Probably non-verbal information that has not been captured through the audio recording.

• Symbols for silence and noise

... Three dots indicate a one second-pause. They are used to indicate pauses within and in between utterances.

(.05) A pause of more than one second. Used to indicate pauses within and in between utterances and turns.

1 Background noise has only been indicated in the transcription of a few lessons, not all.
A continuous line underneath the teacher or a learner's turn preceded by square brackets means there is background noise from the classroom while attention is required from the whole class. When time is indicated it gives information on the duration of the background noise or murmur when this is longer than the utterance it overlaps with.

BOB'S LESSON ON 1/4/92

Class: 3B
Date: Wed. 1st April 92
Recording: 3rd
Duration: One hour
Set up: There is a microphone stand facing the blackboard. The cordless microphone is with group L3, L4 and L17 first and then with L1, L4 and L17.

DESCRIPTION OF TASKS AND STAGES

LOCATION OF SHIFT: 035

TASK 1: PROBLEM SOLVING

PERFORMANCE STAGE (continuation)
Input: a handout with three plans, a one-paragraph description of each plan.
In groups, students choose the best plan to improve traffic conditions in the town of Anglebury and justify it. Students also make notes of the solution they reach.

LOCATION OF SHIFT: 355

REPORTING STAGE
Students get into different groups. Each student presents his/her plan (a decision taken in performance stage) and tries to persuade other members of the group.
LESSON TRANSCRIPT (Bob. 1/4/92)

((Before the class starts and while the teacher is getting ready, L1 and L2 are talking in Catalan about the activities they will work on today in class))

T L1, don't speak about it. Not now.
L1 But it's true. ((Chuckles))
T ((Chuckles)) I know. I want you to speak about it in English. And you've spoken— if you've said everything you want to say in Spanish before we start the class...
L1 OK
T Speak about what you did last night. ((Chuckles))
L1 ((Chuckles))
T Or what a nice day it is or or anything. But not that.

((Teacher is still getting ready. The class has not started yet))

T All right OK. Sn::: Don't speak (about it yet). At the moment you are talking about the problem in Spanish and you'll finish saying what you've got to say.
L ((Talking about the activity))
T L L, don't even mention it. Because you'll finish saying everything you've got to say in Spanish and then when I go around and ask you, you'll say: Ya está, ya he terminado. Yeah?
L L ((Chuckles))
T And we won't speak any English. Remember you come to class to speak English, yeah? Right, yesterday we were looking at a problem, yeah? Eh the problem is in a town called what?
LL Anglebury.
T Anglebury, yeah. And what was the problem in Anglebury?
L3 Traffic.
LL Traffic.
T Hey?
LL Traffic.
T Traffic. That's right, yeah. Too much traffic or too many traffic?
LL Too much.
T Too much. That's it. Yeah, OK. Right. And I asked you to go home last night and you- in between today and last night we examine the problem together... Now then what we're going to do now is first of all talk about our groups. So what's the situation with your groups. Are you all in the correct group?
LL Yes. / (XX)
T Yes. L5, L3, L4 you are not [exactly XX.
L3 [No.
T L3 and L4 you two were together, weren't you? Yeah?
L3 Yes.
T Yesterday? Yeah? L5, who were you with? Marisa.
L5 Marisa... Mônica.
T And Mônica. Yeah. All right, let's move round with Mônica a little bit. L12, who were you with?
L12 Yeah, they are not here.
L3 [(Chuckles)]
T [(None of them? No?]
L12 (XX)
T Right. Let me think about you... Let me think about you for a minute. L, who were you with?
L (XX)
T Those three, yeah? And you three were together?
L15 XXX
T You were together or you weren't together?
L15 No.
T You weren't together. (04) Well then. Right. I told you this would happen, didn't I?

((Teacher is thinking out how to group some of the students)) (.11)

((Some students—L2 050 and L10—who are already in their groups start to work on the activity))

L17 ((Comes in)) Hello.
T Hello L17. How are you?
L17 Fine.
T Marvellous. ((Chuckles))
L17 ((Chuckles))
T Right. (03) L18, you were with L 2, weren't you?
L18 | Yes.
T | [Yesterday. Right, OK. Right. Oh!]
T-L1 L1, just a minute. We- I've got an enormously complicated problem here.
T-C Right. (.02) I want you, if you were with a person yesterday, to go and sit with that person but make sure you are separated and well separated from the other people. So L5, move away from L18 and L12. Move over there (if you can). I want to see who is with each group.
C ((Taking new seats for .07))
T L14, were you here (yesterday)?
L14 (XX)
T Who were you with?
L14 With L15.
T All right. Now L15 says to me that you weren't with him.
L15 No, Jaime, no.
L14 You were with X.
T Ana. sh. Right, yeah. L16, you are going to join this group and they are going to present you a solution to this problem. Let me XX. (Let me XX) ((Self talk)) L17, you work with L3 and L4 here, yeah? Right. OK. God! I think now we've got virtually everybody in groups we were in yesterday. So we've got group one, two, three, four, five and six . . . Good. Now, last night you thought about the solution to this problem, yeah? E: h, ehm what I want each group to do now, is to exchange their ideas about the problem and produce a definitive plan . . . This plan you will present to another group, OK? as . . . your definitive plan. So, what's important about your plan is that the other group can understand you. So, you must write on a piece of paper five or six points about the plan and present that to the other group very very clearly . . . If it's not clear the other group will not understand you. And usually when people don't understand each other in the English class, they say: Ah.
LL ((Chuckles))
T Yeah? ((Chuckling)) So make sure they understand you because I'd like to talk about it. So there are a few phases here. One produce the definitive plan and secondly we'll present it to the other people. OK?
L (XX)
T Right. So you all know what you are doing now? 078
LL Yes.
T Yes! ((Imitating the students' low energy))
C Yes. ((Chuckles))
Right OK fine. (Let's go then)

L3 Come on. (.08) L17, (If) you write, OK?
L17 Ah! Yes.
L3 Thank you. Eh m L4, tell me your plan.
L17 I ((Chuckle))
L4 (XX)
L17 About this and this town.
L4 Which plan?
L3 We had two. ((Chuckles)) Dual plan.
L4 (.02) I didn't I didn't the plan. (.07) ¿Qué quieres XXX?
L3 Hombre pero la X no es un plan.
L4 (Yeah)
L3 My favourite plan it's number A.
L4 My favourite is B.
L3 ((Chuckles))
L4 But is very . . .
L3 ((Chuckles)) Number A is is perfect.
L4 ((Signs twice)) I don't think so.
L3 Which is your favourite plan?
L17 I don't know. (.51)
L4 ((Chuckles))
L3 We we choose the plan A. People who lives here in this part of the city=
L4 =No, no! Eh m this is a very small city, isn't it? Yes, is a-
look at this. ((Showing handout))
L3 Small market town ((Reading)).
L4 Look at this. It's a small town. So you can go walking from a place to another.
(.27)
L4 Well, make up your mind.
L3 ((Chuckles)) She is thinking. ((Chuckles))
L4 Ay! Let me see the following plan.
L3 Is D, isn't it?
L4 Yes.
L3 I'm just looking at this [and I don't like this ((Chuckles)) very much.
L17 I think-
L3 Too expensive.
L4 Yes.
(.03)
L3 This plan.
L3 B?
L17 Yes. ((Chuckles))
L3 B.
B? [X cuatro posibilidades.

L17 [B.

L4 ((Reading excerpts from plan B aloud for .03))

L17 ((Reading excerpts from plan C aloud for .08))

L3 This is the the pedestrian. Yes?

L17 Yes.

L3 But the city is here (.02) and the problem is in the city.

L17 Then . . . the plan A.

L3 Eh?

L17 A.

L3 The Plan A. . . [I think so.

L4 [Which one?

L3 The plan A, she says.

L4 ((Chuckles))

L3 Loo- look at the price. It's very cheap.

L4 ((Laughter))

L17 It's the best one. Yes.

L4 ((Chuckles))

(.04)

L17 XXX

L3 We we can make a mix between A and B. (Are not) very similar.

(.07)

T-G Have you got your definitive plan?

L3 No.

T You've got until half past to produce the definitive plan. Because what will happen you will go to another group and try to persuade the other group that your plan is better than theirs.

L3 OK. (.03) So do you like A? (.02) [Do you like it?

L4 [No.

L3 Why?

L4 Because the the through (w.p.) traffic eh continuará.

L3 The through (w.p.) traffic?

L4 Sí, el tráfico este continuará XX.

(.11)

L3 Yes, but there will be subways for the . . . eh peatons, X I don't know, for the people who is walking and X cars won't stop.

L17 What plan?

L3 A.

L17 A. (.03) But people who lives in the center ehm his car is [in the tourist-

L4 [There will be a lot of pollution and . . .

(.03)

L3 Pollution?
Yes. Contaminación.

¿Por qué?

El tráfico. [El tráfico.

¿Dónde?

Sí, en la ciudad.

(Sonrisas)

¿Has pensado en un plan?

Sí, hay algunos cuadrados.

Sí, tienes unos minutos para producir el plan definitivo, ¿eh?

Mm.

¿Por qué no me dirás ahora?

Tienes diez minutos para hacerlo. ... ¿Has decidido algo?

Ehm. Cruce de peatones.

No, es un paso de peatones.

Área. Sí. Fácil. Right. Imagina que soy otro grupo, 162 ¿puedes explicar tu plan a mí?

((Risas))

No ahora?

No, ahora.

Tienes diez minutos para hacerlo. ¿Sí.

Sí. Tienes mucho trabajo que hacer aquí, ¿eh?

Sí.
T Now, obviously don't be dogmatic about it. Your restriction is ten minutes to produce a plan, yeah?

L17 Yes

T OK? ((Moves away))

L3 Well=

L17 =Half of the this plan and half of [(this plan)

L3 [We can [...

L4 [XX.

L3 OK, what's that you don't like from the first plan? ... We can change it.

L4 (.02) All right. We we put the the plan A all the plan A.

¿Vale? And we can ... we can (.02) take of ... =

L3 First, eh the plan A. OK.

L4 To para desviar un poco la circulación. ¿no?

L3 From the plan B wha- what? The pedestrian-?

L4 The bridge. That bridge.

L3 Ah . . . and from the plan A this . . . Ay! Sorry B.

L4 Sí, sí. (.03) We can do this.

L3 That's perfect. So the cars will enter to the city here, they come here and go out. And here there will be no problem because is the plan A. ((Chuckles)) How does it cost? (.08) (How does it cost?) ((Self talk))

L4 We can take the plan B from here to here (in order to build a) bypass.

L3 XX?

L4 O sea cogemos hasta aquí sólo. Cogemos hasta aquí. El plan B.

L3 Mm.

L4 Luego lo cogemos entero, la variante.

(.04)

L3 Mm. Entonces los que vengan por aquí, ¿qué tendrán que X?

L4 Eh? Los que quieran venir por aquí, pues esto lo atraviesan. Pero los que no tengan- no ves que . . . los que vengan por aquí lo atraviesan porque aquí están
mal. Es un puebloco asqueroso. No va a venir nadie o casi nadie. Los que vengan por aquí, XX.

L3 O sea que ahora ensuciarás tres carreteras. Esta esta esta y esta, pero esta no. Bueno no está mal. (.03) OK, let's write it. ((Chuckles))

L3 I(((Chuckles))

LL I(((Chuckles))

L17 Well, the plan A and B?

L3 Ah no! Pero seguramente lo querrá con (.02) ¿cómo lo querrá? con should. No con . . .

L4 Sí, con conditional

L3 Con conditional, X.

L17 Develop?

L3 Develop, desarrollar. Desarrollar.

L17 Ah desarrollar! Would develop, no? (.04) The plan A. ((Writing for .11)) OK.

(.04)

L3 And (.04) we would take the . . . the bridge of plan B.

L17 ((Writing for .07))

Y del plan C quería hacer algo. (.04) Sí ehm and to build the north-west bypass.

To rejoin the A437 west of the town. ((Reading and dictating))

((Writing))

And that's our plan. (.03) ¿El coste aproximado qué sería? ¿Ciento cincuenta mil libras? ¿Eh?
Approximately.

L3 More or less the cost would be... (08)

L17 The cost would be? ((Writing))
L3 A ver un momento. (.07) Del B también lo hacemos todo, ¿verdad? (.18) Aquí en el C pone: Build the bridge across the railway. ¿Es el mismo que el del B?

L4 What?
L3 Aquí al principio it seems like the ((Pointing to handout)) is the same?
L4 No.
L3 X bridge. (.03) Where is the B... bridge?
L4 Here we are bypass. To catch the bypass in order to go into the town.

(.03)
T-G Have you got your plan yet?
G Yes.
T Yeah? Go on imagine I'm another group and explain your plan to me.
L3 OK XX.
T |((Chuckles)) Come on=
LL |((Chuckles))
L17 =We would develop.
T Good. Sorry.
L17 We would develop all the plan A and we would take the bridge of the plan B to avoid the traffic delays. We would build a north-west bypass to rejoin the A347 west of the plan. ((Reading))
T Mhm.
L17 Of the plan C.
T Mhm... Fine, good. All right. Now actually when you talk to the other groups illustrate that on the plan, yeah? OK? Good, that's what we want.

T-C Right, you've now got two minutes to finalize your plan.
L3 A ver, ¿El coste?
L4 En torno a los dos novecientos cincuenta.
L3 Dos millones noveciento cincuenta. Pero el C lo hacemos todo, ¿no?
L7 ¿Lo hacemos todo?
L3 Qué X! Lo habremos hecho todo del C.
L17 Dos millones. XX.

(.09)
L3 Sí sí. Todo el A, todo el B y el C.
L4 El C es todo también, ¿no?
L3 Y todo el C. Total dos millones novecientos cincuenta.
L17 ((Writing))

((One of the students makes the joke about publishing
this in the BOE. L3, L4 and L17 have finished the
activity. They wait for 1.05. In between L17 says: Two
years.))

L4 The duration?
L3 ((Yawning)) The duration.
L4 We can make the (XX.
L17 About two years.
L3 No.

L3 ((For .21 rereading the plan and chuckling)) For the
Olympics.

((Because of technical problems this part of the lesson is
not recorded. During that time L7, L3 and L4 are off-
task since they finished with the writing. On and off
they will join L12 and L19 who are talking about getting
into IESE. The teacher has written some sentences about
will/going to, which students will need to present their
plans. Then the teacher tells students to make new
groups so that they can present each other their plans))

T Right. Sh::::: Before you start . . . before you start. 355
(.02) Present your plan to the other group . . . and
the other group must then make criticism of it. OK?
Remember we are using conditionals here. Yeah. This
part of the exercise is a conditional exercise. Yeah. Fine.
LL Yeah.
T And and also when you've done that, try and persuade
the new person in your group that your plan is better
than his or her plan, OK? So that should be two plans
being argued here. You understand what you are 361
doing?
LL Yes.
T Yes!
LL ((Chuckles))
T All right. Let's go then, eh?
((L1, L17 and L3 are one of the new groups. They get ready to start))

L1 Eh we decide the if if there can be one plan that we never can solution their own problems in the plan in this town. And and if we choose only plan no no ((Chuckles)) make a decision we make a decision with plan D and the plan A . . . two plans eh? [because=
L3 D and A.
L1 =D no |D D D and A.
L3 |D D D yes.
L1 Because if we choose only the plan D we wouldn't resolve the traffic problem in the center of the town. If we choose only the plan A, we wouldn't resolve the traffic problem in the outskirts.
L3 Outsk- yes yes i understand.
L1 You understand. And we finish our X. ((Chuckles)) Nothing more. You know another solution better than than the plan D plus the plan A?
(.02)
L17 We have decided about=
L1 =Do you have another [solution?
L17 [Plan A.

L12 (Comes in))
T Hi, (XX L12 in). Would you go and sit sort of next to L2 or somewhere around there?
L12 (Sits down))
T XX brilliant, thanks. Aha. Aha, so who do you often talk to?, who would you never talk to? Here are some sentences, just to give you a guide. Yes? You talk about it with a partner, which is going to be two, two, three, two, three. Come here. Who would you go and talk to when you got a problem and why? Yeah? And here is just some sentences to guide you. OK? ...

((Students start activity. The following are simultaneous conversations from two groups))

L12 I don't understand. Who do you ask for a ...?
L2 Yes, when you have a problem, and X=
L1 =who do you ask.
L2 Yes. Who who you explain your problem.
(03)
L12 Què és advice?
L2 Advice is ...
L1 Help more or less?
L2 Yes. I have a problem and I explain my problem to you.
L12 Vale. [Comencem?
L2 (And you: yes you say: I think you should.

   T-G Don't worry too much about the question. (03)
   T-G if you got a problem, who would you go to?
   T-G Like for example, for me I'd never go to my father.
   T-G ((Laughter))
   LL ((Laughter))
   T Depends, possibly if it was a money problem. If it was a money problem
L12 Vale. Comencem. Perquè . . . (Chuckles)

L2 Vale. (.03) I often ask my wife for advice
((Reading example sentences from the book))

L12 Mhm.

L2 I sometimes I ask my mother for advice.
((Reading from the book))

(08)

L1 Well, is about you you explain who you ask and she said what?

L12 Eh?

L1 Eh this exercise is eh for eh to say who you who do you ask and why.

L2 =When you have problem.

L12 Ah!

L2 For example, in my work when I have a problem I ask eh my director for advice.

L1 Ia, ia, ia.

L? ¿Em de parlar d'això del X? ((Maybe a student from another group))

L1 Mhm. In my house when I was when I have a problem I ask to my I ask my mother for advice.

L Mhm.

(05)

L12 I ...

L1 You don't ask?

L2 You don't have problem? (((Chuckles))

L1 (((Chuckles))

L12 Yes, but I: I ask myself. (((Chuckles))

L12 ((Chuckles))

L12 No sé. Jo què sé. Com és diu almo- cuixí en anglès?

LL (Ja està). / (((Chuckles))

L12 My cuixí.
L2 In my house when I have a problem I ask my husband for advice. And when I have a problem with eh a friend for example, I'll ask this friend for advice to solve the problem.

((Teacher is trying to find the beginning of the next listening activity on the cassette))

T All right. Who would you go and see if you got a problem? Who would you—L2, who do you talk to when you have a problem?

L2 Eh, it depends. In my work I ask my director for advice.

T [Aha, I (.02) I ask my director? . . . I would, aha?

L2 I would.

T Aha, OK.

L2 I would ask my director for advice.

T Right. Aha.

L2 And if I have problems in my house I ask, I would ask ((Chuckles)) my husband for advice.

T Right. OK, all right. If you have a look at those sentences, you will see some adverbs . . . Mhm? Can you see some adverbs?

LL Yes.

T What position in the sentence does the adverb have?

LL Before the verb.

T Before the verb. Do you remember last week we were looking at some adverbs? . . . Do you remember looking at some adverbs? . . . I'll just— I'll take you to the page, see if see if that jogs your memory. We looked at some adverbs (down here. ((Showing the page))

F [Yes.

M Yes.

T Yeah? What position did these adverbs have? (.04) What position did these adverbs here have? Can you remember?

L3 ((Shaking his head))

T You weren't here, all right. [You're free L3.

F [At the end.

LL At the end.

T At the end.
At the end.

OK? So that's one of the problems with adverbs in English. They can go in different places. What type of adverb is this? What type=

Frequency.

Frequency. Lovely.

((Chuckles))

If we go back and have a look at what we did last time, on page 73. What type of adverb is carefully, gently?

((Chuckles)) Modal. / Modal. /

Manner.

OK. Aha, manner. The way you do it. How you do it. The manner, OK? So it depends the type of adverb the position in the sentence, yeah? Make, just make a note of that. So you've got frequency adverbs which go before the principal verb, before the main verb and then you've got adverbs of manner which go after, yeah?

not after the verb

after the verb plus the complement or the subject, yeah? (.04)

So you have to be a little bit careful with where you put adverbs in English.

The modal. 119

Yes a saber.

The modal. 119

((Chuckles))

The clause.

After the de tot, no?

Mhm?

After the-com es diu frase clause?

At the end, no?

Mhm.

(.05) All right, OK . . . We're going to listen to . . . (How many sentences. Just a minute) ((Self talk)), we are going to listen to eight sentences and you have to tell me how many words there are in each sentence, yeah? We've done this before. So e:h (.03) as an example this sentence, I don't like getting up early.
How many words?

L10 [Six.
T I don't like getting up early.
L10 [Seven.
T I do not like getting up early. ((Uttered slowly))
L1 F [Seven.
T So contractions count as one word, right?
OK, we'll listen to them, once . . . You're working individually, yes? Don't tell me the number. Give everybody an opportunity to sort of . . . think think for themselves, yeah? So do it-, everyone is working individually at the moment, yeah?
First time individually. And total, eight sentences. OK? Ready?
M-F Ni idea.

(.07)
L11 Can you repeat? (At some point I think that L7 149 asks L11 if contractions count as one or two words. L11 answers back with a nod))
LL X./X.
(.05)
R Four. The best way to make friends is to join a club.

All right? Let’s go back, go back to the beginning. (Let me get my book so that I don’t have to think) ((Self talk)).

Six. / Six? / Seven.

Lovely. L5. Seven. Right, now can you- there’s seven words, can you write it down? Can you write the sentence?
Unit nineteen, lesson R exercise four. One. Why don’t you stop seeing him?
((.15 to write the sentence down))
Repeat. Don’t copy. Try and work individually.
You know there are seven words. You know it must make sense. And just as another help, what type of sen- , what are we doing today? What are we doing? What’s the focus of today’s class? ... What’s the word on the blackboard? ... Advice, so these sentences are related to advice, OK? That’ll help you a lot.

One. Why don’t you stop seeing him?
OK. All right. What have we got? How many words have you got?

One two three four five six. You've got a problem. Yeah?

((Claps once))

Six.
Six.

seeing.

Ah!

seeing him. What did you have? What did you have, L3?

Why don't you stop singing. ((Laughter)) Sorry, I shouldn't laugh. sorry.

((Laughs))

((Murmur about what everyone has written))

| Okay. All right. Sh sh sh. Can you do number two. Write number two down. |

How many words?
Oh sorry, before I do that, how many words?
Ten. / Eight. / Ten. / ((Laughter))
And the number is...
(Six)
Eight.
Eight?
So who said eight? L7, did you say eight?
Yeah)
Ah, well done. All right. OK, are you finding this difficult?
Mhm.
Yeah, all right. Individually you can compare. So we are looking for a sentence with eight words related to advice. yeah? So use... ((Pointing to her forehead)) your brain.
Two. I don't think you should get married.
((.16 working individually))
Listen again.
((.04) ((Start talking in pairs))
Compare. You can compare as long as you talk in English, you
can compare.

T OK. But what we're doing here, we've talked a'bout it before,

  because in English we don't stress every sound ((Clapping
  four times)). We ((Making noise with her mouth)) (we eat our
  words, yeah?)
