“Impactes de la recerca. Una aproximació pràctica”

Dra. Marta Soler Gallart
Universitat de Barcelona

EUROPEAN
COMMISSION

SEVENTH FRAMEWORK
PROGRAMME

**IMPACT-EV – Evaluating the
impact and outcomes of
European SSH research
(2014-2017)**

Impactes de la recerca

- **Impacte Científic** producció i publicació científica dels resultats de la investigació, tenint en compte l'índex de citació dels mateixos, la presentació d'aquests en congressos o d'altres fòrums acadèmics i les oportunitats que els resultats de la recerca ofereixen per a la realització d'investigacions posteriors.
- **Impacte Polític** impacte que es produeix quan els resultats de la recerca tenen una repercussió dins l'esfera política gràcies a la transferència dels mateixos. Aquest impacte implica que les i els responsables polítics, així com altres agents socials elaboren noves polítiques o reformes i/o accions basades en els resultats obtinguts a través de la investigació científica, les quals contribueixen a la transformació de cada realitat social sobre la que s'intervé.
- **Impacte Social** millores socials assolides com a conseqüència de l'aplicació dels resultats d'un projecte de recerca en particular o estudi. Les nostres societats ja han definit els reptes socials i metes (com ara els objectius d'Europa 2020, Objectius del Mil·lenni, etc.) i la necessitat de desenvolupaments de recerca i innovacions per abordar-los. Sovint, els impactes socials no són immediats, sinó que es reuneixen en un període a llarg termini.

SOCIAL IMPACT OPEN REPOSITORY

<http://www.ub.edu/sior/sior.php>

sior@ub.edu

Per què?

SIOR, el nou repositori, permet establir paràmetres que mesuren les millores socials generades pels projectes científics. Promou una alternativa necessària a l'estancament dels resultats científics i permetent generar un veritable impacte social.

En què contribueix SIOR?

- Promou la investigació amb impacte social
- Permet als investigadors i les institucions de recerca que aportin contribucions clares a la ciència i a les societats. A part de reconèixer el seu propi treball (Vinculat a ORCID)
- Augmenta la internacionalització de les investigacions de manera que s'amplia la preocupació per l'impacte social a través de la comunitat investigadora en SSH.

Estructura general i mesura de l'impacte social

Social Targets

Specify in which social targets is oriented the project:

Targets for the EU in 2020 **Millennium Development Goals** [Add target](#)

Employment ☐ Increasing employment of the population aged 20-64 (EU target = 75% employed)

Climate change and energy sustainability ☐ Reducing greenhouse gas emissions (EU target = by reducing greenhouse gas emissions 20% (or even 30%, if the conditions are right) lower than 1990)
☐ Increasing the use of energy from renewables (EU target = reaching the 20%)
☐ Increasing energy efficiency (EU target = 20% increase)

R&D ☐ Increasing the rate of EU's GDP to be invested in R&D (EU target = reaching 3%)

Education ☐ Reducing the rate of early school leavers (EU target = being below 10%)
☐ Increasing the rate of 30-34-year-olds completing third level education (EU target = 40% at least)

Fighting poverty & social exclusion ☐ Reducing the number of people in or at risk of poverty and social exclusion (EU target = 20 million less)

SOCIAL IMPACT PROJECTS

INCLUSIVE CITIES PROJECT

Harvard Kennedy School

Reducing urban poverty from the organizational capacities of the working poor

Inclusive Waste Management

Evidence:

Integrating Waste Pickers into Municipal Solid Waste Management in Pune (India). Structurally, SWaCH is a workers' cooperative and powersvest with the members. All members are working members, not merely shareholders. Women constitute 78 per cent of SWaCH membership. While this holds for most age groups, the presence of men is higher in the youngest age group and among the aging. Most SWaCH members used to work as waste pickers or itinerant waste buyers. Housekeeping and cleaning workers constitute another significant group. Members of the Scheduled Castes continue to be the majority in SWaCH. Other Backward Castes, as well as the middle castes, are represented in SWaCH.

WIEGO

Women in Informal Employment: Globalizing and Organizing Harvard Kennedy School

Home-Based Workers

Evidence:

One of the intended results of the project was the improved legal status of informal workers in Thailand. HomeNet Thailand successfully campaigned for the enactment of a national law protecting homeworkers, ratified in 2010. The law provides for protection of wages – including equal pay for men and women doing the same job – as well as occupational health and safety and responsibilities of employers toward homeworkers. It also establishes a Committee for the Protection of Homeworkers on which both men and women will serve, ensuring women have a role in decision making. Between 500,000 and 2 million workers are affected by this legislation.

Women Come Together to Learn and to Earn

Evidence:

In a rural community on the outskirts of Jinja, Uganda, a group of women are creating—quite literally—a better future for themselves and their families. The 35 women of Kyebajja Tobona Women's Group, came together, in their own words, “as a result of being oppressed by poverty.” These women, many of whom are mothers or grandmothers and wives or widows—and many of whom are HIV positive—“pondered how we can get out of poverty, and we remembered we are from the villages, where we learned how to make handcrafts.”

Social

Employment

75% of the 20-
64 year-olds to
be employed

- Creació d'empreses basades en les troballes d'Atapuerca (20 empreses)
- Creació de nous llocs de treball

The screenshot shows the ATAPUERCA website, which is the web page of Juan Luis Arsuaga and the UCM-ISCIII research team. The header features the ATAPUERCA logo and navigation links: Home, Atapuerca, Other Projects, Bulletin Board, Resources, Team, Ancestros Foundation, Image Files, Arsuaga's Notebook, and Credits. A search bar with the text 'BUSCAR' is present. The main content area is titled 'BIENVENIDA DE JUAN LUIS ARSUAGA' and contains a welcome message in English. To the left of the main text are sections for 'Images' (showing a 'nature' magazine cover) and 'Videos' (showing a video player for 'ATAPUERCA. EL ADN HUMANO'). To the right is 'Arsuaga's Notebook' with a list of links and a 'News' section at the bottom right showing a video of a person holding a bone.

BIENVENIDA DE JUAN LUIS ARSUAGA

This is the webpage of a group of Spanish researchers. It does not represent an academic or scientific institution, nor any particular research project, although the researchers affiliated with this page belong mainly to the Universidad Complutense de Madrid and devote most of their research activities to the Atapuerca sites. We carry out our research at the Centro de Investigación de Evolución y Comportamiento Humanos (a joint research institute between the UCM and the Instituto de Salud Carlos III). We are interested in human evolution in its broadest sense, covering the physical, mental, and social transformations experienced by our ancestors through time and that have made us what we are today. Other topics include their diseases, the natural changes in the environment and weather which have conditioned our history and the human-induced changes in the biosphere since the beginning of agriculture and animal

I am interested in synthesizing techniques and learning from multiple disciplines to find novel ways of understanding and reconstructing language history. In particular, I use the comparative method, supplemented by sociolinguistics, geolinguistics, and cognitive linguistics, and I also consider external historical and prehistorical (archeological) data. Most of my work applies to Slavic languages and languages in contact with them (Romance, Germanic, Finno-Ugric).
