

NEUROPSYCHOLOGIA

An international journal in behavioural and cognitive neuroscience

Editor-in-Chief

MICHAEL RUGG, Center for Vital Longevity and School of Behavioral and Brain Sciences, University of Texas at Dallas, 1600 Viceroy Drive, Suite 800, Dallas, TX 75235, USA (neuropsychologia@elsevier.com)

Section Editors

MEMORY – MICHAEL RUGG, Center for Vital Longevity and School of Behavioral and Brain Sciences, University of Texas at Dallas, 1600 Viceroy Drive, Suite 800, Dallas, TX 75235, USA (neuropsychologia@elsevier.com); KEN A. PALLER, Department of Psychology and Interdepartmental, Neuroscience Program, Northwestern University, Evanston, IL 60208-2710, USA

PERCEPTION – SABINE KASTNER, Department of Psychology, Princeton University, Princeton NJ 08544, USA, (skastner@princeton.edu)

ATTENTION AND CONSCIOUSNESS – JENNY COULL, Laboratory of Neurobiology and Cognition, Universite de Provence, Marseille, France, (jennifer.coull@univ-provence.fr)

LANGUAGE – SOPHIE SCOTT, Institute of Cognitive Neuroscience, University College London, 17 Queen Square, London, WC1N 3AR, (sophie.scott@ucl.ac.uk)

EXECUTIVE FUNCTION AND COGNITIVE CONTROL – MARIE BANICH, Department of Psychology, D420 Mvzinger Hall, University of Colorado at Boulder, UCB 344, Boulder, CO 80309, USA (Marie.Banich@colorado.edu)

EMOTION AND SOCIAL NEUROSCIENCE – DAVID ZALD, Department of Psychology, PMB 407817, Vanderbilt University, 2301 Vanderbilt Palce, Nashville, TN 37240-7817, USA (david.zald@vanderbilt.edu); STEPHAN HAMANN, Psychology Department, Emory University, Atlanta, GA 30322, USA, (shamann@emory.edu)

ACTION AND MOTOR CONTROL – THOMAS SCHENK, Universitätsklinikum Erlangen, Neurologische Klinik, Schwabachanlage 6, 91054 Erlangen, Germany, (thomas.schenk@uk-erlangen.de)

Editorial Advisory Board

R. ADOLPHS, Pasadena, CA
J. P. AGGLETON, Cardiff
D. ANSARI, London, ON
A. R. ARON, Los Angeles, CA
S. BARON-COHEN, Cambridge

AIMS AND SCOPE

Neuropsychologia is an international interdisciplinary journal devoted to experimental and theoretical contributions that advance understanding of human cognition and behavior from a neuroscience perspective. The journal will consider for publication studies that link brain function with cognitive processes, including attention and awareness, action and motor control, executive functions and cognitive control, memory, language, and emotion and social cognition. *Neuropsychologia* has a long history of publishing lesion-deficit studies, and these remain highly appropriate for the journal. Submission of papers describing the use of other methodologies – most notably functional and structural neuroimaging, cognitive electrophysiology, and transcranial magnetic stimulation – is strongly encouraged, however. Animal studies are also welcome, provided they have a direct and explicitly specified impact on understanding human cognition and behavior. Studies of clinical populations that are primarily descriptive or intended to elucidate a clinical disorder, or that evaluate a therapeutic intervention, are not appropriate for the journal. Special issues and Review Papers are published regularly with the aim of providing authoritative surveys of topics of major interest.
