

The UB's CRAI and the SDGs

In September 2020 the Learning and Research Resources Centre (CRAI) of the University of Barcelona (UB) presented its Sustainability Plan.

It will also serve to promote our institutional commitment to the Sustainable Development Goals (SDGs) promoted by the United Nations with the 2030 Agenda and always aligned with the UB's general objectives.

A PLAN WITH 9 GOALS

4 priority goals

In accordance with its mission, the CRAI has to prioritize them in order to facilitate access to quality resources and services, necessary to contribute to the creation and dissemination of knowledge and to the comprehensive training of future professionals.

4 goals of contribution to society

As a commitment of the CRAI to its environment.

1 goal of contribution of global citizenship

Since many of the activities carried out at the CRAI go beyond its spaces or the closest territory.

OUR COMMITMENT

To reflect, in an ethical and transparent manner, CRAI's commitments to create sustainable value in the short and long term, to respond to the needs of its users and stakeholders, while preserving their fundamental rights.

WHAT DOES THE PLAN ACHIEVE?

Over the next few years, the Plan will be the tool that will allow us to consolidate good practices in environmental, economic and social sustainability issues within the CRAI.

EVALUATION

In each of the Plan's goals are indicated the actions to be developed, the CRAI unit responsible for carrying them out and the control indicators that will allow us to verify the degree of compliance achieved in accordance with the 2030 Agenda.

In addition, some of the goals that make up this Plan are also strategic objectives of the UB's CRAI and they are directly linked to the current Strategic Plan.
