2022 Activity Report

Institut de Nanociència
i Nanotecnologia

UNIVERSITAT DE
BARCELONA

Foreword

Dr. Guillem Aromí Bedmar
IN²UB Director

Dear colleagues and friends,

It is a pleasure to present the Activity Report of IN²UB, reflecting on the contribution of our organization to enhance the scientific and educational excellence of the University of Barcelona, as well as its commitment to our society, during the year 2022.

The year revised has been especial because it has witnessed the renewal of the Steering Committee following an election incorporating the regulations recently approved by the UB Council. I use this opportunity to thank the members that have ended their term after several years of dedication, and welcome the new members, who with their talent and renewed

motivation are already contributing to shape the IN²UB of the future. I also thank the new Committee for confirming their trust in my person to lead the Institute for a second term. I hope that this new period will serve to increase the positive impact of the organization in both directions; towards improving the status of its members and towards the exterior.

The year 2022 has witnessed again a net improvement of the IN²UB regarding the most relevant indicators of inputs and outputs. Being one of the largest Institutes of UB, IN²UB is among these that has experienced the biggest improvements in relative terms and the most growing in absolute terms with regard to production and attraction of funds. This is despite

the fact that the organization has not enjoyed yet the label of excellence by the AEI and its associated grant, Maria de Maeztu, which continues to be a major goal.

With independence that the above long sought recognition has not yet arrived, the activities and data listed in this report are a satisfying demonstration of the dedication and passion of the IN²UB community for top science, for commitment to teaching and training and for a very active engagement with outreach to the general public.

I hope you enjoy scanning through this display of healthy dedication to serve UB and the society who sustains us.

1. About in²ub

1.1. PRESENTATION

The Institute of Nanoscience and Nanotechnology of the University of Barcelona (IN²UB) was created in 2006. Its main goal is to coordinate and enhance multidisciplinary research among research groups from the Faculties of Chemistry, Physics, Pharmacy and Food Sciences, Biology, Earth Sciences and Medicine and Health Sciences that work on the different phenomena occurring at the nanoscale. This collaborative spirit aims at integrating both, internally and internationally, interdisciplinary activities which integrate equally, basic and applied research.

The IN²UB wants to contribute to the progress of science, while spurring, at the same time, industrial excellence. In this sense, several spin-off companies are now led by IN2UB researchers. Finally, all members of the IN2UB are strongly involved in teaching endeavours, the most important programs being the Master of Nanoscience and Nanotechnology and the Doctoral Program of Nanoscience. Research and Education serve us to convey our strong commitment with society.

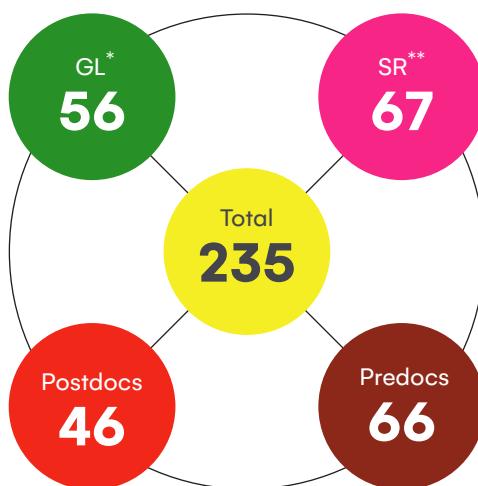

IN²UB gathers around 200 researchers (including permanent, postdoctoral researchers and Predoctoral Researchers). They are organized in research groups distributed among seven major research areas:

1. Modeling, Simulation and Nanoscopic Methods (NanoMet)
2. Nanobioscience, Nanobiomechanics and BioNanotechnology (NanoBio)
3. Nanopharmaceutics and Nanomedicine (NanoPharmaMed)
